Education

Studying B.Tech. – Computer Science and Engineering (AI)

(currently in the 7th semester).

Amrita Vishwa Vidyapeetham, Coimbatore

CGPA (upto 6th semester): 7.75 / 10

Course duration: 2023 – 2027

Higher Secondary Certificate

Petit Seminaire Hr. Sec School, Puducherry

83.5%

2023

Technical Skills

- **Programming:** C++, Python, Data Structures & Algorithms
- **AI:** ML, DL, NLP, RAG, LLMs, Transformers, AI Agents, LangChain/LangGraph, MCP, n8n
- **CS fundamentals:** OOP, DBMS, OS, and networking.
- **Backend & Databases:** Django/FastAPI, REST APIs, SQL, PostgreSQL
- **DevOps:** Git, GitHub, Docker, Kubernetes, Linux, Vercel/Render

Projects

1. NLP-Telugu Multi-Turn Dialogue [GitHub](#) *Python | Gemma 3 | Sarvam-1 | MuRIL | FAISS | NLP* Apr 2026

- Developed a domain-specialized prompting framework for Telugu multi-turn dialogue generation, benchmarking Gemma 3 and Sarvam-1 models on the IndicDialogue corpus.
- Constructed an end-to-end system utilizing Gemma 3, MuRIL embeddings, and FAISS Vector DB to achieve 99% semantic fidelity (BERTScore) across 10,000+ dialogue samples.

2. AI-skin-doctor-master [GitHub](#) *PyTorch | ResNet18 | FastAPI | React.js | SQL | Gemini AI | Docker* May 2026

- Developed a skin lesion classification system using PyTorch and ResNet18 on multiple medical datasets.
- Built a full-stack AI healthcare platform with FastAPI and React, integrating Gemini AI for contextual medical assistance, MySQL for data management, and JWT-based authentication with role-based patient, doctor, and admin access.

3. SQL-Fitness Tracker [GitHub](#) *PostgreSQL | React.js | Node.js | SQL | REST APIs | GitHub* May 2026

- Developed a calorie and nutrition tracking website using PostgreSQL databases, ReactJS, and Node.js.
- Added an AI chatbot to provide meal suggestions and nutrition insights using NLP prompts.
- Created dashboards to visualize daily calorie intake, trends, and nutrient balance.
- Optimized backend API endpoints for high-performance food search and tracking.

Experiences

Research Intern

Dec 2025 – Mar 2026

- Worked on EEG-based BCI applications, including P300 speller and motor imagery tasks at Amrita Vishwa Vidyapeetham Coimbatore. Gained hands-on experience in EEG signal acquisition using Emotiv Epoch X, demonstrating keen interest and developing relevant technical skills.

Achievements

- **DravidianLangTech 2026 (July):** Published a research paper on NLP - **LIMP for Telugu Multi-Turn Dialogue Generation**, introducing a novel Rasa-guided prompting framework for low-resource languages.
- **IEEE RECCAP 2026 (March):** Authored an accepted research paper on **ML-DANN** for subject-independent BCI, using (CNN-LSTM + Attention) and contrastive learning to outperform benchmarks on the GIB-UVA dataset.
